Payment Fee Configuration

The screenshot shows the 'Payment Fee' configuration page in the MagePrince admin panel. The interface is divided into several sections: General Settings, Payment Fee Settings, Payment Method Payment Fee, and Apply Payment Fee For Specific Customers. Callouts provide detailed explanations for various fields and actions.

General Settings:

- Price Type:** A dropdown menu with options: 1. Fixed Price, 2. Percentage Price, 3. Per Row, 4. Per Item. The current selection is 'Percentage Price'.
- Refund fee:** A dropdown menu set to 'Yes', with a callout: 'Enable/Disable Refund Payment Fee'.

Payment Fee Settings:

- Minimum order amount:** A text input field containing '0', with a callout: 'Minimum Order amount to calculate Payment fee'.
- Maximum order amount:** A text input field containing '9999', with a callout: 'Maximum Order amount to calculate Payment fee'.

Payment Method Payment Fee:

Payment Method	Fee	Action
Check / Moni	10	
PayPal Expre	5	

Callouts for this section include: 'Select Payment Method' (pointing to the dropdown), 'Add Payment Fee' (pointing to the 'Add Fee' button), and 'Delete Payment Fee' (pointing to the delete icon).

Apply Payment Fee For Specific Customers:

A multi-select dropdown menu showing customer groups: 'NOT LOGGED IN', 'General', 'Wholesale', and 'Retailer'. A callout says: 'Select customer groups to allow Payment Fee'.

Price Type Explanation

1. Fixed Price: Payment fee will be added as a fixed price.

2. Percentage Price: Payment fee will be added as the percentage price.

a) Include shipping in subtotal: Yes

i. $\text{Subtotal} = \text{Subtotal} + \text{Shipping}$

b) Include discount in subtotal: Yes

i. $\text{Subtotal} = \text{Subtotal} - \text{Discount}$

For example: Payment fee = 10 and cart subtotal = 36 then 3.60 extra.

3. Per Row: Payment fee will be added based on total product count.

For example, Payment fee = 10 and there are 2 products in the cart then 20 extra fees will be added.

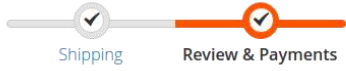

4. Per Item: Extra fee will be added based on the total qty of products in the cart.

For example, Payment fee = 10 and there are 1 product with qty 2 and other products with qty 1 then a total 30 Payment fees will be added.
